EXPERIENCE

INFOSYS

| SENIOR SYSTEM ENGINEER |

Feb 2022 - Present | Gurugram

- I underwent comprehensive training in **Java** and **Database Management Systems (DBMS)**, followed by successful completion of advanced coursework in **JavaScript** and **React.js**.
- Developed real-time data update features using **Redux** and **WebSockets**, resulting in a **60 percent** reduction in data latency and a **75 percent** increase in data accuracy.
- Optimized the claims portal interface, resulting in a **25 percent** reduction in average patient claims submitting time and streamlining administrative processes.
- Created custom reporting tools using **React** and **Redux** for the seamless UI, enabling healthcare administrators to generate customized reports on patient outcomes and treatment trends, increasing data-driven decision-making and improving operational efficiency.
- Participated in code reviews to ensure code quality, adherence to coding standards, and best practices, fostering a collaborative and quality-focused development environment within the team.

PROJECTS
